

高速卷门(堆积式) / Fast doors series

"吉安达"牌堆积式高速卷门是在吸取国内外同类产品优点的基础上自主研发生产的"抗风型"高速门产品。采用折叠高速提升,内置横向抗风杠杆设计,使风压可以均布于门帘整体。具有良好的抗风性能,同时也具有滚筒式高速卷门的各种优点。适用于大面积、大跨度的各类建筑。高要求频繁物流的各类建筑外墙专用快速门。

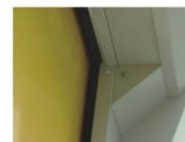

Stacked high speed door is a new generation door that used in large buildings.

It has the good windproof function, with the steel tube in side, which can greatly resist the wind.

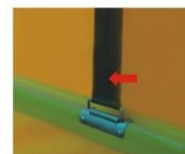

| 性能特点 |

密封材料采用多层胶合材料,表面独特的耐磨层面,具有高强度、耐磨、耐腐蚀等特点。
 Sealing material multi-layer glued materials, a unique surface Wear level, has high strength, wear, corrosion resistance and other characteristics.

门体上每个连接部件经过精心设计,外观美观,结构紧凑合理。
 On each connected component of the door has been carefully designed Beautiful appearance, compact structure and reasonable.

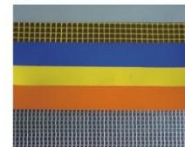

背带采用高强度涤纶织带(汽车安全带),具有拉力与耐磨性强等特点。
 Strap made of high strength polyester webbing (car seat belts) With tension and wear resistance and other characteristics.

门体底部装有柔性的涂层基布,可与各种不平整的地面紧密结合。减少噪音,增加密封效果。
 The bottom of the door is equipped with a flexible coating fabric, Closely integrated with a variety of uneven ground. Reduce the voice, to increase the sealing effect.

采用德国著名品牌SEW高速电机,电压220v-380v,功率0.75KW~2.2KW,IP55,50HZ。
 Well-known brand in Germany SEW speed motor, voltage 220V-380 V, power 0.75KW ~ 2.2KW, Ip55, 50HZ.

法国进口高密度工业涂层基布,阻燃、耐磨、耐刮、抗腐蚀,易清洗,经久耐用。有多种颜色可供选择。
 French high-density industrial coated fabric, Abrasion resistance, Heat resistant, scratch resistance, corrosion resistance, easy to clean, durable. There are a variety of colors to choose from.
